

## EXC-P53BP1 LED Pixel Light

Application Environment:  
Indoor  
Outdoor

### Description

**EXC-P53BP1 full-color series** consists of full-color chip LED string pixel lights specially designed by EXC for outdoor landscape lighting. It adopts top-level optical vision angle design, super remote multi-color and visual brightness consistency technology and precision control. Each pixel is a separate four-primary lighting pixel, and each pixel can realize 8/16bit grades gray scale changing; they can be used for extra-large area display of building facades, contour shaping, interior and exterior surface decoration lighting; the pixel pitch can be customized; the installation methods are various.

### Features

- The newest generation technology: DMX512 parallel bus design
- Close range anti-glare optical design
- Integrated clip-on endless connection
- Fully sealed and waterproof design with high thermal conductive adhesive imported from Germany
- Special outdoor lightning and ESD protection

### Basic Specifications

Color	W(2200-6500K), RGB, RGB+W
Working Voltage	15V/24V
Max. Power Consumption	2.7W
Light Source	9pcs SMD LEDs
CRI	80
Control	ON/OFF, DMX512
Grey Scale	8bit, 16bit
Source Life	50,000h
RDM	Optional
LED chip Brand	Optional(Cree, OSRAM, Lumileds, Epistar, etc...)
Cover	PC(Transparent,Opal,Crystal)
Housing	PC+ABS
Weight	65g
Dimensions	65mm x 52mm x 14.5mm (L x W x H, exclude Mounting Bracket)
Installation	Installation By Aluminum Profile
Working Temperature	-40°C to 60°C

Storage Temperature	-40°C to 70°C
Protection Rating	IP66
Luminous Flux	25LM/W(RGB), 50LM/W(White), 30LM/W(RGBW)
Central Light Intensity	45cd(W)/27cd(RGB)/36.5cd(RGB+W)
Beam Angle	120°/105°/115°/130°

### Light Intensity Distribution

Light Intensity Chart

### Physical Dimension

Unit: mm

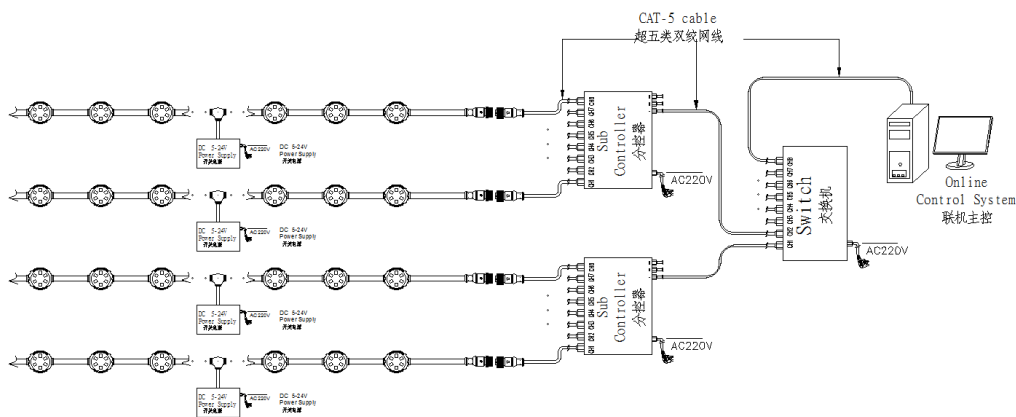

### Installation with Aluminum Profile

### System connection diagram:

- 1, Host controller should connect with slave controller. Working voltage for controllers are AC220V.
- 2, On-line main controller should connect with slave controller, on-line main controller and sub controller working voltage are AC220V.
- 3, each sub-controller with 8 ports, with each port 512 pixels, supporting data converter, supports 100 meters ultra-long haul transmission.
- 4, The CAT-5 e. cable distance should be within 100 meters between host controller and slave controller, between slave controllers and switch, etc.
